

## 1. Description

### 1.1. Project

|                 |                       |
|-----------------|-----------------------|
| Project Name    | SK-STM32F417_USB_CHID |
| Board Name      | SK-STM32F417_USB_VCP  |
| Generated with: | STM32CubeMX 5.6.0     |
| Date            | 03/30/2020            |

### 1.2. MCU

|                |               |
|----------------|---------------|
| MCU Series     | STM32F4       |
| MCU Line       | STM32F407/417 |
| MCU name       | STM32F417ZGTx |
| MCU Package    | LQFP144       |
| MCU Pin number | 144           |

## 2. Pinout Configuration

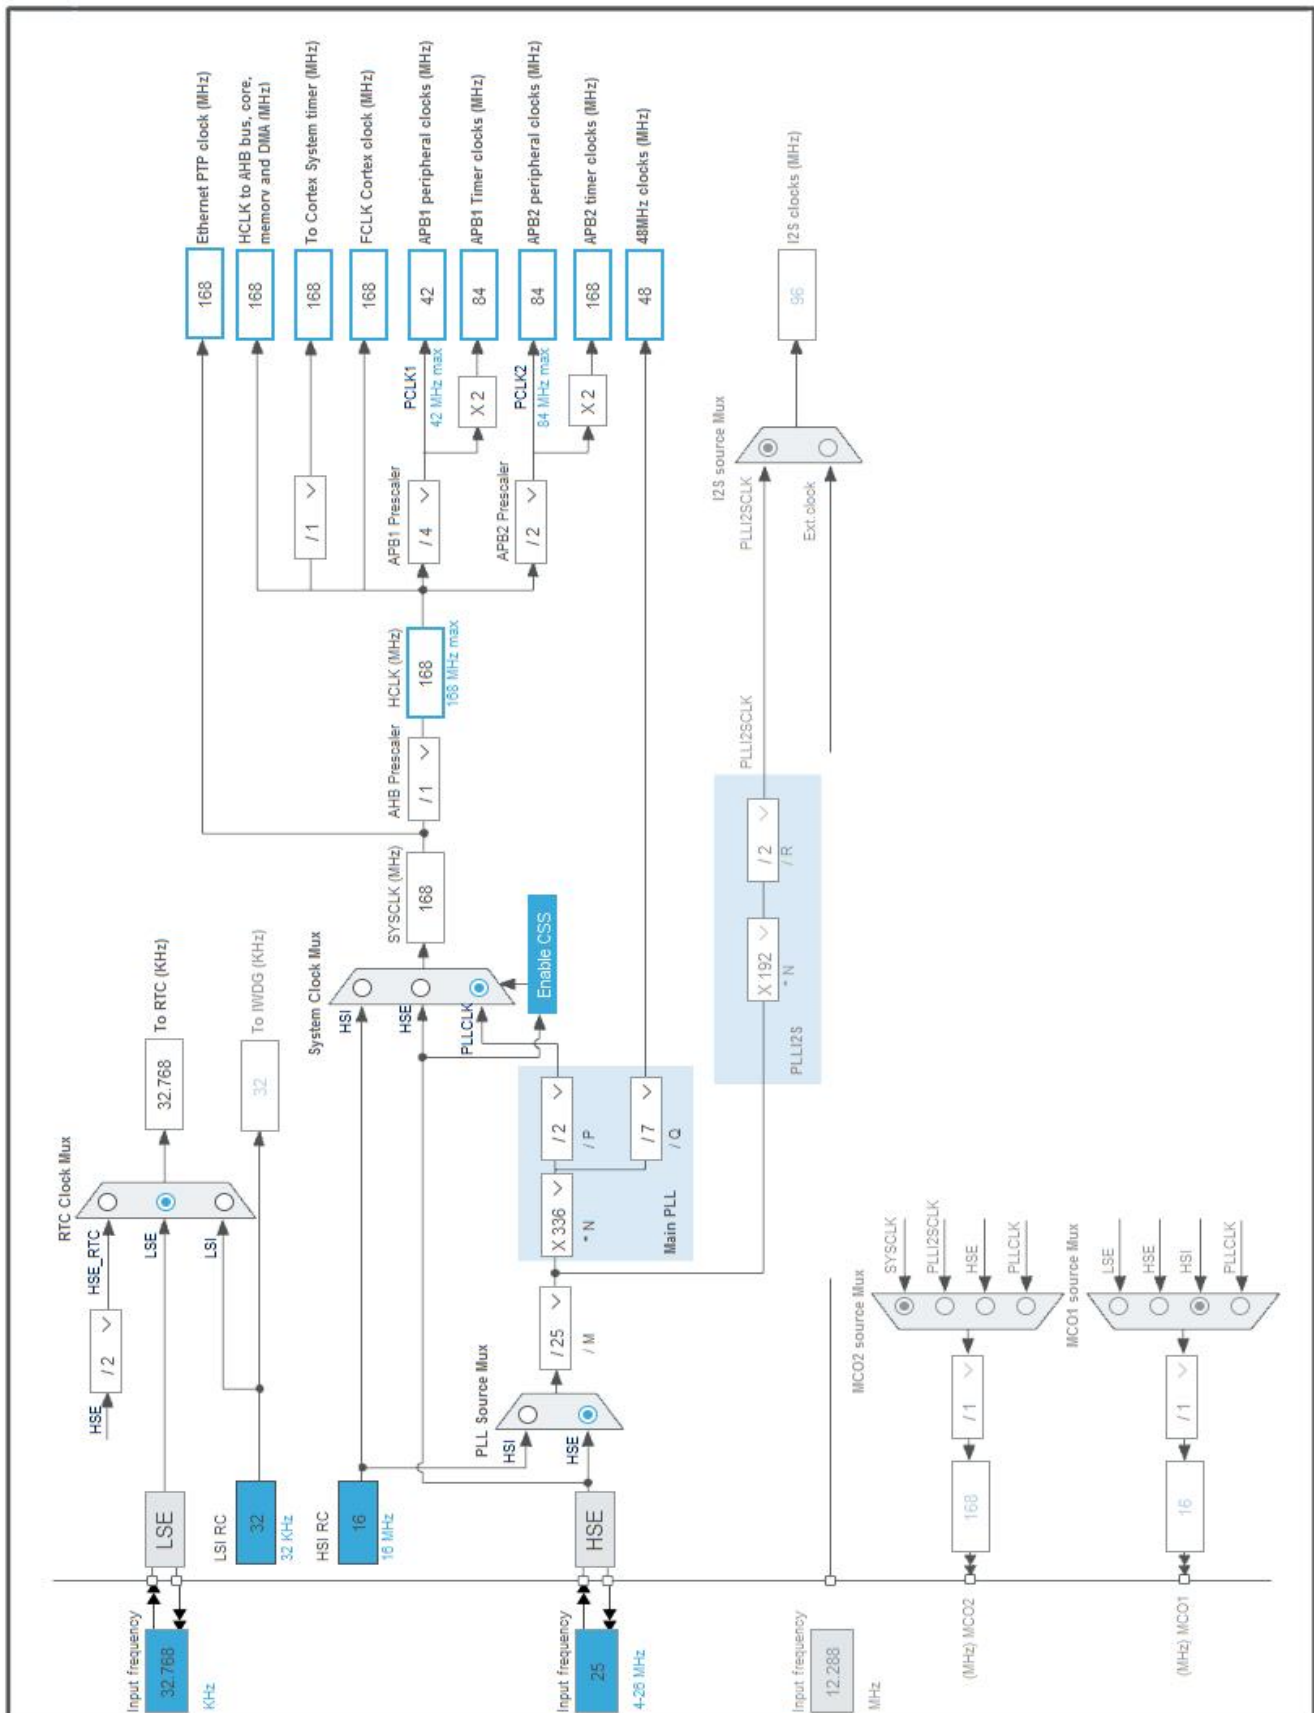

### 3. Pins Configuration

| Pin Number<br>LQFP144 | Pin Name<br>(function after<br>reset) | Pin Type | Alternate<br>Function(s) | Label      |
|-----------------------|---------------------------------------|----------|--------------------------|------------|
| 6                     | VBAT                                  | Power    |                          |            |
| 7                     | PC13-ANTI_TAMP *                      | I/O      | GPIO_Output              | LED_PC13   |
| 8                     | PC14-OSC32_IN                         | I/O      | RCC_OSC32_IN             |            |
| 9                     | PC15-OSC32_OUT                        | I/O      | RCC_OSC32_OUT            |            |
| 16                    | VSS                                   | Power    |                          |            |
| 17                    | VDD                                   | Power    |                          |            |
| 18                    | PF6 *                                 | I/O      | GPIO_Input               | SD_DETECT  |
| 19                    | PF7 *                                 | I/O      | GPIO_Output              | LED_PF7    |
| 23                    | PH0-OSC_IN                            | I/O      | RCC_OSC_IN               |            |
| 24                    | PH1-OSC_OUT                           | I/O      | RCC_OSC_OUT              |            |
| 25                    | NRST                                  | Reset    |                          |            |
| 30                    | VDD                                   | Power    |                          |            |
| 31                    | VSSA                                  | Power    |                          |            |
| 32                    | VREF+                                 | Power    |                          |            |
| 33                    | VDDA                                  | Power    |                          |            |
| 38                    | VSS                                   | Power    |                          |            |
| 39                    | VDD                                   | Power    |                          |            |
| 51                    | VSS                                   | Power    |                          |            |
| 52                    | VDD                                   | Power    |                          |            |
| 61                    | VSS                                   | Power    |                          |            |
| 62                    | VDD                                   | Power    |                          |            |
| 71                    | VCAP_1                                | Power    |                          |            |
| 72                    | VDD                                   | Power    |                          |            |
| 83                    | VSS                                   | Power    |                          |            |
| 84                    | VDD                                   | Power    |                          |            |
| 93                    | PG8 *                                 | I/O      | GPIO_Output              | USB_PULLUP |
| 94                    | VSS                                   | Power    |                          |            |
| 95                    | VDD                                   | Power    |                          |            |
| 101                   | PA9                                   | I/O      | USART1_TX                |            |
| 102                   | PA10                                  | I/O      | USART1_RX                |            |
| 103                   | PA11                                  | I/O      | USB_OTG_FS_DM            |            |
| 104                   | PA12                                  | I/O      | USB_OTG_FS_DP            |            |
| 106                   | VCAP_2                                | Power    |                          |            |
| 107                   | VSS                                   | Power    |                          |            |
| 108                   | VDD                                   | Power    |                          |            |
| 120                   | VSS                                   | Power    |                          |            |

| Pin Number<br>LQFP144 | Pin Name<br>(function after<br>reset) | Pin Type | Alternate<br>Function(s) | Label      |
|-----------------------|---------------------------------------|----------|--------------------------|------------|
| 121                   | VDD                                   | Power    |                          |            |
| 130                   | VSS                                   | Power    |                          |            |
| 131                   | VDD                                   | Power    |                          |            |
| 138                   | BOOT0                                 | Boot     |                          |            |
| 139                   | PB8 *                                 | I/O      | GPIO_Input               | BUTTON_PB8 |
| 140                   | PB9 *                                 | I/O      | GPIO_Output              | LED_PB9    |
| 143                   | PDR_ON                                | Reset    |                          |            |
| 144                   | VDD                                   | Power    |                          |            |

\* The pin is affected with an I/O function

## 4. Clock Tree Configuration

## 5. Software Project

### 5.1. Project Settings

| Name                              | Value  |
|-----------------------------------|--|
| Project Name                      | SK-STM32F417_USB_CHID                          |
| Project Folder                    | D:\projects_home\STM32_CubeMX\SK-STM32F417\SK- |
| Toolchain / IDE                   | MDK-ARM V5                                     |
| Firmware Package Name and Version | STM32Cube FW_F4 V1.25.0                        |

### 5.2. Code Generation Settings

| Name  | Value                                 |
|---|---------------------------------------|
| STM32Cube MCU packages and embedded software                    | Copy only the necessary library files |
| Generate peripheral initialization as a pair of '.c/.h' files   | No                                    |
| Backup previously generated files when re-generating            | No                                    |
| Delete previously generated files when not re-generated         | Yes                                   |
| Set all free pins as analog (to optimize the power consumption) | No                                    |

## 6. Power Consumption Calculator report

### 6.1. Microcontroller Selection

|           |               |
|-----------|---------------|
| Series    | STM32F4       |
| Line      | STM32F407/417 |
| MCU       | STM32F417ZGTx |
| Datasheet | 022063_Rev8   |

### 6.2. Parameter Selection

|             |     |
|-------------|-----|
| Temperature | 25  |
| Vdd         | 3.3 |

### 6.3. Battery Selection

|                   |                 |
|-------------------|-----------------|
| Battery           | Li-SOCL2(A3400) |
| Capacity          | 3400.0 mAh      |
| Self Discharge    | 0.08 %/month    |
| Nominal Voltage   | 3.6 V           |
| Max Cont Current  | 100.0 mA        |
| Max Pulse Current | 200.0 mA        |
| Cells in series   | 1               |
| Cells in parallel | 1               |

### 6.4. Sequence

|                               |             |                           |
|-------------------------------|-------------|---------------------------|
| <b>Step</b>                   | Step1       | Step2                     |
| <b>Mode</b>                   | RUN         | STOP                      |
| <b>Vdd</b>                    | 3.3         | 3.3                       |
| <b>Voltage Source</b>         | Battery     | Battery                   |
| <b>Range</b>                  | Scale1-High | No Scale                  |
| <b>Fetch Type</b>             | FLASH       | n/a                       |
| <b>CPU Frequency</b>          | 168 MHz     | 0 Hz                      |
| <b>Clock Configuration</b>    | HSE PLL     | Regulator LP Flash-PwrDwn |
| <b>Clock Source Frequency</b> | 4 MHz       | 0 Hz                      |
| <b>Peripherals</b>            |             |                           |
| <b>Additional Cons.</b>       | 0 mA        | 0 mA                      |
| <b>Average Current</b>        | 46 mA       | 280 $\mu$ A               |
| <b>Duration</b>               | 0.1 ms      | 0.9 ms                    |
| <b>DMIPS</b>                  | 210.0       | 0.0                       |
| <b>Ta Max</b>                 | 98.93       | 104.96                    |
| <b>Category</b>               | In DS Table | In DS Table               |

## 6.5. RESULTS

|               |                  |                 |             |
|---------------|------------------|-----------------|-------------|
| Sequence Time | 1 ms             | Average Current | 4.85 mA     |
| Battery Life  | 29 days, 4 hours | Average DMIPS   | 210.0 DMIPS |

## 6.6. Chart

## 7. IPs and Middleware Configuration

### 7.1. GPIO

### 7.2. RCC

**High Speed Clock (HSE): Crystal/Ceramic Resonator**

**Low Speed Clock (LSE) : Crystal/Ceramic Resonator**

#### 7.2.1. Parameter Settings:

##### System Parameters:

|                   |                    |
|-------------------|--------------------|
| VDD voltage (V)   | 3.3                |
| Instruction Cache | Enabled            |
| Prefetch Buffer   | Enabled            |
| Data Cache        | Enabled            |
| Flash Latency(WS) | 5 WS (6 CPU cycle) |

##### RCC Parameters:

|                                |      |
|--------------------------------|------|
| HSI Calibration Value          | 16   |
| HSE Startup Timeout Value (ms) | 100  |
| LSE Startup Timeout Value (ms) | 5000 |

##### Power Parameters:

|                               |                                 |
|-------------------------------|---------------------------------|
| Power Regulator Voltage Scale | Power Regulator Voltage Scale 1 |
|-------------------------------|---------------------------------|

### 7.3. RTC

**mode: Activate Clock Source**

**mode: Activate Calendar**

#### 7.3.1. Parameter Settings:

##### General:

|                               |               |
|-------------------------------|---------------|
| Hour Format                   | Hourformat 24 |
| Asynchronous Predivider value | 127           |
| Synchronous Predivider value  | 255           |

##### Calendar Time:

|  |                      |
|--|----------------------|
| Data Format                                | BCD data format      |
| Hours                                      | 0                    |
| Minutes                                    | 0                    |
| Seconds                                    | 0                    |
| Day Light Saving: value of hour adjustment | Daylightsaving None  |
| Store Operation                            | Storeoperation Reset |

**Calendar Date:**

|          |         |
|----------|---------|
| Week Day | Monday  |
| Month    | January |
| Date     | 1       |
| Year     | 20 *    |

## 7.4. SYS

**Timebase Source: SysTick**

## 7.5. USART1

**Mode: Asynchronous**

### 7.5.1. Parameter Settings:

**Basic Parameters:**

|             |                           |
|-------------|---------------------------|
| Baud Rate   | 115200                    |
| Word Length | 8 Bits (including Parity) |
| Parity      | None                      |
| Stop Bits   | 1                         |

**Advanced Parameters:**

|                |                      |
|----------------|----------------------|
| Data Direction | Receive and Transmit |
| Over Sampling  | 16 Samples           |

## 7.6. USB\_OTG\_FS

**Mode: Device\_Only**

### 7.6.1. Parameter Settings:

|                       |                            |
|-----------------------|----------------------------|
| Speed                 | Device Full Speed 12MBit/s |
| Low power             | Disabled                   |
| Link Power Management | Disabled                   |
| VBUS sensing          | Disabled                   |
| Signal start of frame | Disabled                   |

## 7.7. USB\_DEVICE

## Class For FS IP: Custom Human Interface Device Class (HID)

### 7.7.1. Parameter Settings:

#### Class Parameters:

|   |              |
|---|--------------|
| CUSTOM_HID_FS_BINTERVAL   | <b>0x5 *</b> |
| USBD_CUSTOM_HID_REPORT_DESC_SIZE (Total length for Report descriptor (IN ENDPOINT)) | 2            |
| USBD_CUSTOMHID_OUTREPORT_BUF_SIZE (Maximum report buffer size (OUT ENDPOINT))       | 2            |

#### Basic Parameters:

|  |                     |
|--|---------------------|
| USBD_MAX_NUM_INTERFACES (Maximum number of supported interfaces)       | 1                   |
| USBD_MAX_NUM_CONFIGURATION (Maximum number of supported configuration) | 1                   |
| USBD_MAX_STR_DESC_SIZ (Maximum size for the string descriptors)        | 512                 |
| USBD_SELF_POWERED (Enabled self power)                                 | Enabled             |
| USBD_DEBUG_LEVEL (USBD Debug Level)                                    | 0: No debug message |

### 7.7.2. Device Descriptor:

#### Device Descriptor:

|   |                        |
|---|------------------------|
| VID (Vendor Identifier)                       | 1155                   |
| LANGID_STRING (Language Identifier)           | English(United States) |
| MANUFACTURER_STRING (Manufacturer Identifier) | STMicroelectronics     |

#### Device Descriptor FS:

|   |                              |
|---|------------------------------|
| PID (Product Identifier)                        | <b>22352 *</b>               |
| PRODUCT_STRING (Product Identifier)             | STM32 Custom Human interface |
| CONFIGURATION_STRING (Configuration Identifier) | Custom HID Config            |
| INTERFACE_STRING (Interface Identifier)         | Custom HID Interface         |

## 8. System Configuration

### 8.1. GPIO configuration

| IP         | Pin            | Signal        | GPIO mode                    | GPIO pull/up pull down      | Max Speed             | User Label |
|------------|----------------|---------------|------------------------------|-----------------------------|-----------------------|------------|
| RCC        | PC14-OSC32_IN  | RCC_OSC32_IN  | n/a                          | n/a                         | n/a                   |            |
|            | PC15-OSC32_OUT | RCC_OSC32_OUT | n/a                          | n/a                         | n/a                   |            |
|            | PH0-OSC_IN     | RCC_OSC_IN    | n/a                          | n/a                         | n/a                   |            |
|            | PH1-OSC_OUT    | RCC_OSC_OUT   | n/a                          | n/a                         | n/a                   |            |
| USART1     | PA9            | USART1_TX     | Alternate Function Push Pull | No pull-up and no pull-down | <b>Very High</b><br>* |            |
|            | PA10           | USART1_RX     | Alternate Function Push Pull | No pull-up and no pull-down | <b>Very High</b><br>* |            |
| USB_OTG_FS | PA11           | USB_OTG_FS_DM | Alternate Function Push Pull | No pull-up and no pull-down | <b>Very High</b><br>* |            |
|            | PA12           | USB_OTG_FS_DP | Alternate Function Push Pull | No pull-up and no pull-down | <b>Very High</b><br>* |            |
| GPIO       | PC13-ANTI_TAMP | GPIO_Output   | Output Push Pull             | No pull-up and no pull-down | Low                   | LED_PC13   |
|            | PF6            | GPIO_Input    | Input mode                   | <b>Pull-up</b> *            | n/a                   | SD_DETECT  |
|            | PF7            | GPIO_Output   | Output Push Pull             | No pull-up and no pull-down | Low                   | LED_PF7    |
|            | PG8            | GPIO_Output   | Output Push Pull             | No pull-up and no pull-down | Low                   | USB_PULLUP |
|            | PB8            | GPIO_Input    | Input mode                   | <b>Pull-up</b> *            | n/a                   | BUTTON_PB8 |
|            | PB9            | GPIO_Output   | Output Push Pull             | No pull-up and no pull-down | Low                   | LED_PB9    |

### 8.2. DMA configuration

nothing configured in DMA service

### 8.3. NVIC configuration

| Interrupt Table                         | Enable | Preenmption Priority | SubPriority |
|---|--------|----------------------|-------------|
| Non maskable interrupt                  | true   | 0                    | 0           |
| Hard fault interrupt                    | true   | 0                    | 0           |
| Memory management fault                 | true   | 0                    | 0           |
| Pre-fetch fault, memory access fault    | true   | 0                    | 0           |
| Undefined instruction or illegal state  | true   | 0                    | 0           |
| System service call via SWI instruction | true   | 0                    | 0           |
| Debug monitor                           | true   | 0                    | 0           |
| Pendable request for system service     | true   | 0                    | 0           |
| System tick timer                       | true   | 0                    | 0           |
| USB On The Go FS global interrupt       | true   | 0                    | 0           |
| PVD interrupt through EXTI line 16      | unused |                      |             |
| Flash global interrupt                  | unused |                      |             |
| RCC global interrupt                    | unused |                      |             |
| USART1 global interrupt                 | unused |                      |             |
| FPU global interrupt                    | unused |                      |             |
